Mr. Michael Chelminski of Stantec is present representing the City of Westfield Conservation Commission.

Mr. Chelminski states that Stantec has submitted a revised peer review letter today (1/26/2021), based on the comments from the Commission during the meeting of January 12th. The first item updated was regarding the General Performance standard #1 for Bordering Land Subject to Flooding, which states that the "Compensatory Storage area shall have an unrestricted hydraulic connection to the same waterway or waterbody." DEP has provided guidance saying that an observational determination satisfies this standard and modeling is not necessarily needed; Therefore, Stantec has updated their memo. Mr. Chelminski explains that the second item is that while the building would increase localized floodwaters velocity, the entire area is predicted to be under 8-9 feet of water and the land is largely developed. As such, he recommends using past precedence to decide whether to issue this permit. Coordinator Borenstein states that she expected an updated compensatory storage plan as was requested and discussed on 1/12/2021. Mr. Levesque addresses the questions about the comp storage area. Mr. Twersky explains that they are under a time constraint. Ms. Ruth Aborjally asks for a second exit to East Main Street from Mainline Drive. Mr. Twersky states that a second exit is being considered. Commissioner Sharp asks if Mr. Twersky has addressed his question of deeding this property to the City of Westfield in the future. Atty.
