

May 2nd through May 8th 2021 is National Drinking Water Week

*The City of Westfield Water Resources Division reminds consumers high quality water is
"There When You Need It"*

The [City of Westfield Water Resources Division](#) and partners throughout North America today kicked off [Drinking Water Week](#), by highlighting the different ways consumers' tap water is "There When You Need It." Drinking Water Week is May 2-8 this year.

Westfield's Water Resources Division is observing Drinking Water Week by recognizing the vital role tap water plays in daily life, the infrastructure that is required to carry it to and from homes and businesses, and the critical work that water professionals accomplish around the clock.

"Tap water continues to serve an integral role in meeting our daily hygiene needs during the coronavirus pandemic," said American Water Works Association CEO David LaFrance. "Water professionals, the infrastructure they work to design, create and maintain, and the treatment process all work in harmony to ensure safe tap water is 'There When You Need It.'"

To commemorate the week, water utilities, water organizations, government entities, environmental advocates, schools and others throughout North America and beyond are encouraging consumers to learn more about the importance of water and water infrastructure, especially in times of crisis.

About Drinking Water Week

For several decades, AWWA and its members have celebrated Drinking Water Week, a unique opportunity for both water professionals and the communities they serve to join together in recognizing the vital role water plays in daily lives. Free materials for download and additional information about Drinking Water Week are available on the [Drinking Water Week webpage](#).
